Expertise: **Customer Journey • Lean Startup MVP • Product Development & Launch • Product Growth Strategy**

Profile: Entrepreneurial product leader with over 18 years of experience delivering successful innovations to the marketplace. Experienced in managing and growing complex product portfolios. Strong reputation of quickly establishing organizational alignment and building product momentum. Highly driven and passionate about customer experience and value delivered to customers. Strong track record of defining and executing successful product strategies and product roadmaps. Collaborative leader with experience in creating vision, identifying opportunities, building, and evaluating teams, delivering growth and executing projects to assist businesses in gaining competitive advantage. Proficient in financial and budgetary management, adept at optimizing costs and enhancing ROI.

Experience:

NextGen Technologies., Frisco, TX **March'24- Current**

Founding Product Manager

NextGen Technologies is a AI startup building an AI-powered care coordination platform for senior living and memory care communities. Our solution combines cloud infrastructure, real-time data from smart sensors, and predictive ML models to enable proactive care and safety monitoring at scale

Accomplishments:

- Leading product strategy, vision, and go-to-market for an AI-driven care platform in the senior living and memory care space
- Launched pilot in 5 senior living communities, improving response times by 30% and reducing caregiver workload
- Designing an ML-based risk engine for fall and behavioral event prediction, achieving 70% early detection accuracy
- Defined integration roadmap for 10+ IoT and EHR systems, reducing incident reporting time by 45%
- Driving investor engagement and market positioning at the intersection of aging, AI, and cloud-enabled care

Experience gained in:

- Made product decisions where care, dignity, and safety were non-negotiable, aligning execution with empathy for aging populations.

Microsoft Inc., Irving, TX **March'22- Feb'24**

Principal Product Manager

Led end-to-end ownership of Azure Compute Extensions platform, overseeing product strategy, design, development, and adoption. Acted as the primary advocate for customer needs, shaping product vision, prioritization, and roadmap.

Accomplishments:

- Initiated the launch of multiple extension services (Azure VM Apps, Run Command, compute gallery), extending their reach to a global clientele and successfully onboarding over 100+ customers.

- In its first year, compute extensions drove over $65 million in revenue, bolstering Azure compute's overall financial performance.
- Developed an overarching 5 years platform vision and strategy with a forward-looking approach, incorporating extensive market research, customer insights, and competitive analysis

Experience gained in:

- Drove executive alignment by fostering consensus and guiding strategic initiatives toward shared product and business goals.

Oracle Inc., Frisco, TX **December'18 – March'22**

Principal Product Manager

Led the comprehensive product strategy, design, development, and adoption of OCI (Oracle Cloud Infrastructure) Global ONSR (Oracle National Security Region) services, overseeing the entire product lifecycle from inception to market delivery. Acted as the voice of the customer needs, driving feature backlog, prioritization, and roadmap alignment.

Accomplishments:

- Bootstrapped and developed ONSR features of OCI from the ground up. It went from zero features to cloud competitive features in three years incurring $100M+ revenue.
- Developed customer centric product vision, roadmap, and go-to-market strategy to deliver a product that customers love.
- Acting as an evangelist, engaging directly with customers and partners, participated in and evangelized in external events and conferences.
- Led multiple POC engagements of key enterprise customers to drive adoption which resulted in over 90% conversion rate.

Experience gained in:

- Collaborated with C-level stakeholders to align product strategy with enterprise priorities. Navigated complex regulatory environments with a strong focus on data security and privacy

Citi Group Inc., Irving, TX **July'12 – December'18**

Vice president Of Application Development

Led end-to-end product delivery for Citi's loan origination and loss mitigation platform, driving efficiency and compliance at scale. Oversaw global production support while delivering SOA-based solutions using modern enterprise tech stack.

Accomplishments:

- Enabled Citi to close most loans within 30 days—a 25% improvement—projected to save $150M annually
- Cut mortgage transaction processing time from 10+ hours to under 1 hour, saving $50M annually and boosting competitiveness

Experience gained in:

- Led cross-functional teams of 60+ and managed $45M+ budgets, while driving strategic decisions on build vs. buy vs. lease initiatives
- Oversaw global 24x7x365 production support, ensuring stability and performance of mission-critical enterprise systems

Earlier roles (2006–2012): Progressively transitioned from software development to product leadership across Wipro, MetLife, Black Knight, and Cognizant. Delivered enterprise software and B2B/B2C solutions for top-tier financial institutions.
